## Girl Guides in Camp at Rock Lake Resort

Four Pass Towns Muster Groups for Annual Camp at Popular B.C. Resort

Several trucks loaded with girls and baggage, besides private cars, moved off shortly at 10 a.m. on Tuesday for Rock Lake, where the Guides and leaders are now settled in their annual camp with District Commissioner Mrs. R. P. Borden as camp commandant.

Bellevue, Hillcrest, Blairmore and Coleman Guides, totalling 87, are in camp, the leaders being Lieut. A. Yuill, Lieut. Mrs. C. J. Devine, Lieut. Mrs. J. J. Devine, Miss Ella Emmerson, Miss Ruth Morrison, Miss Marie Sharkey of the Y.W.C.A., Calgary, is also in camp as instructor in swimming, as Guides have to pass tests before being awarded their badges as first-class Guides.

Mrs. A. B. Westworth also accompanied the Guides and will remain there during the ten days' camp.

No definite arrangements have yet been made for the Boy Scout camp, which it was reported would go into camp after the Guides returned.

Caledonians Honor Mr. and Mrs. Pryde on 50th Anniversary

Coleman Caledonians met at the I.O.O.F. hall Friday evening to honor Mr. and Mrs. Wm. Pryde, in celebration of their 50th anniversary, which occurred on June 10.

Mrs. W. H. Garner was chairman and introduced the various artists on the program, those being Jim Moore, a bagpipe selection; Margaret Roughed song; Mrs. Holmes, recitation; Mr. and Mrs. A. Larkie, duet; Mrs. J. Ramsay, song; Winona Taylor, song; Mr. A. Larkie, song; Peggy Gillespie, piano selection; and Cherry Smith, accompanied by Pezzy Gillespie at the piano, a song. The other artists were accompanied at the piano by Miss Jean Roberts.

During the program Mrs. John Anderson and Margaret Roughed carried in the gifts to the guest of honor, Mr. A. Larkie making the presentation. Mrs. Pryde received a beautiful silver flower basket filled with roses and Mr. Pryde was presented with a pipe.

Mrs. Garner thanked the artists who had contributed to the program, after which lunch was served, followed by dancing.

Cold weather tended to spoil the Caledonian picnic held at the lake on Monday, only a few members turning out.

**HEADS CIVIL SERVICE**  
V. C. Phelan, of Ottawa, who was re-elected President of the Civil Service Federation of Canada, at the recent annual meeting. This is the third consecutive term of office for Mr. Phelan, who acts as chief spokesman for the Dominion Civil Service on matters affecting its employment welfare.

## Local News

John Pratt left at the week-end for Edmonton on a two weeks' vacation.

Miss Julia Ondrus, nurse-in-training at Holy Cross hospital is home on her vacation.

Solon E. Low, of Cardston, will address a public meeting on Social Credit on Friday evening.

Miss Penelope McDonald, nurse-in-training at Holy Cross hospital, Edmonton, is spending her vacation at her home here.

Mr. and Mrs. A. Dewar are spending two weeks' holidays visiting at Lethbridge and will attend the Calgary Stampede, which opens on Monday.

Mr. and Mrs. G. Dick, of Cusick, Wash., accompanied by Mrs. Brown, spent Sunday with Mr. and Mrs. Walter Dibble. They were on their way to Dewinton, near Calgary.

Mr. and Mrs. Caroe and family, Mr. and Mrs. J. Atkinson, Sr., Jonty and Graham, and Miss Isobel Atkinson and Joe Spivak were Banff visitors over the week-end.

Mrs. Wm. Fraser and Mr. and Mrs. Frank Vojprava were the guests of Mrs. Ed. Bernard of Lethbridge over the week-end.

Several from town attended the Pincher Creek celebration on Monday, among them being Lou Gray and John Jackson. Blairmore also attracted a fair quota to the Dominion Day celebration.

Earle Price is making steady progress towards recovery following the amputation of his leg at University hospital, Edmonton. His sister, Margaret, is acting as special nurse and it will be about four weeks before he will return to Coleman.

Several teachers from Coleman public schools are attending the summer school being held at the University of Alberta, Edmonton. Those attending are Ethel and Margaret Dunlop, Muriel Naylor, Edith Haysom, Ethel Wilson, Edna Fairhurst, Miss McDonald. Others attending are Miss Margaret Allan, B.A., and Miss Dora Burrows. The school continues till the middle of August.

The Girl Guides are camping at Rock Lake, instead of McRae's Lake. Camping privilege charges were advanced very heavily over last year, which decided the leaders to select another camp site, several miles this side of McRae's. The girls will have equally as good a holiday as in previous years. The boys' healthy camp life and instruction in Guiding will prove very beneficial.

Returning from Fernie after midnight on Sunday, a car driven by Ed. Yagoo, a young man living in Coleman, with a party of friends, collided with some tree stumps alongside the highway west of Natal, requiring the wrecking car from Sentinel Motors to bring it in. The injuries to Yagoo consisted of severe lacerations of the scalp, but he was able to go home after being treated at the local hospital. The car was so badly damaged that it was not considered worth repairing.

## The Buyers Guide

When people pay for a newspaper, it is a sure indication they appreciate it. By the same token, it is certain that advertisements will receive careful attention and being in good company, will create a good impression of those who advertise.

*The Journal Goes Into The Home—Its a True Reflection of Community Life.*

## Cool Weather Mars Holiday in Coleman

Causes Cancellation of Tennis Tournament and Keeps Down Attendance at Outdoor Sports

A cold west wind and showers over the week-end put a decided damper over the Dominion Day holidays, causing discomfort and making it necessary to light fires in the homes to take away the chill.

Coleman Tennis Club had made preparations for an interesting tournament for Sunday and Monday, but with such a stiff wind blowing it was impossible to go on with the events, though some gentlemen players came from Lethbridge and some competitions were held with local players.

Some holiday-makers went to Banff, where cool weather and rain prevailed. Waterton Lakes also attracted a number from the district, the main attraction being a dance at the pavilion in the evening.

## Addressed Monster Mass Meeting

WM. ABERHART, B.A.

Calgary Political Evangelist, who last night addressed a monster mass meeting at Bellevue. His political "promise" of \$25 monthly dividend has attracted intense interest, and is exceeded only by Dr. Townsend's plan of \$200 monthly to every person over 60 years. Aberhart says he has the best "bait" of any political party in Canada. Opposing political camps maintain his promises are impossible of fulfillment and the provincial election will be fought with Social Credit as a direct issue.

BRITAIN'S ENVOY

Sir Frederick Leith-Rose, Chief Economic Adviser to the British Government, who heads the delegation which is in Berlin initiating discussions on the commercial and financial relations of the two countries, as affected by the new German machinery for the control of imports and the allocation of foreign exchange.

## COLEMAN DEFEATED AT KIMBERLEY

Coleman soccer team suffered their fifth successive defeat when they were again shut out, this time by Kimberley, who won 5-0. Blairmore were defeated on Monday evening by Fernie 2-0 in a league game. The weather there was cold and wet, dampening the enthusiasm of the fans.

## LOCAL NEWS

Ernest F. Gare has been appointed local representative for the Confederation Life Assurance Co., an old established organization for which A. M. Morrison has been local representative for a number of years, and who recently made arrangements to transfer the agency to Mr. Gare. The latter will be remembered as a former editor of The Journal, selling out here in 1927, and who returned to Coleman recently after living in California.

Mr. and Mrs. Ireland were Lethbridge visitors on Saturday.

## Tragic Death of Boy Thrown From Horse

Instant Death Comes to Walton Godfrey Near Father's Farm

On Saturday afternoon Walton Godfrey, aged 17 years, was riding a horse which had been used on the farm for a considerable time, and which he was trying to break to saddle riding. About a mile and a half from the farm, west of Coleman, in company with a younger brother, he was riding along when something frightened the horse on which Walton was riding and in bucking and plunging it threw him violently to the ground, causing concussion, and it is also reported dislocating his neck, causing almost instantaneous death.

Dr. McLean was called from Coleman but the young man was past all aid, and the coroner, F. J. Turner, of Bellevue, was notified, who after viewing the body decided an inquest was not necessary.

Deceased attended Coleman schools, and had left school to help his parents on the farm. Besides his parents he is mourned by two sisters and a younger brother.

The funeral was held on Tuesday afternoon from the home west of town, the service being conducted by Rev. A. S. Partington, B.A., rector of St. Alban's (Anglican) church, funeral arrangements being in charge of A. E. Ferguson of Crow's Nest Undertaking Parlor.

Deepest sympathy is expressed by friends and acquaintances with the family in their sudden bereavement.

The boxing program announced for Monday night last was cancelled owing to one of the principals not turning up. Another boxer was agreed to go on, backed out shortly before the scheduled time of the program, leaving the promoters no other course but to call off the entire program. Quite a number were on hand at the hall.

## HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Black Tea in a pot of fresh boiling water. After six minutes strain liquid into two quart jars. While hot, add 1½ cups of granulated sugar and the juice of 2 lemons. Stir until sugar is dissolved; fill container with cold water. Do not allow tea to cool before adding the cold water; otherwise liquid will become cloudy. Serve with chopped ice.

# "SALADA" ICED TEA

## Protect Wild Life

This is an age of organization. Men and women, boys and girls, band themselves, together in clubs, associations, unions, large or small, some single isolated groups, others as branches of a Provincial, Dominion, or International body. There are clubs to promote almost every conceivable thing, or object, in which mankind can possibly be interested. Their number is legion, and new organizations spring into existence almost every week.

Many organizations have been in existence for a long time, have large memberships, and very definite objects to serve. They have long occupied a useful and honorable place in our democracy, command the respect of all, and have made worthwhile contributions to society as a whole. Members of such bodies are banded together, as a rule, in support of some great principle to which they are intensely devoted.

There are other organizations which come into being under the stress of temporarily prevailing conditions, and when those conditions change and pass away, these organizations pass out of existence, some having exerted a beneficial influence in the direction of reform and progress, others leaving little but a trail of disillusionment and loss behind them.

It would be impossible to even list, let alone classify, the organizations now in existence making appeal for the support of the public, and it is not the intention of this article to make any such attempt. Rather at this time it is proposed to direct attention to one particular organization, to which no great publicity has been given in past years, but which has been engaged in quietly, but none the less effectively, promoting a cause in which the people of Canada ought to take a very active and active interest. On former occasions the attention of readers of this column has been drawn to other worthwhile organizations, consequently in now singling out one specific organization for a word of commendation we are making no new departure.

The organization now referred to—possibly we should refer to it in the plural and say organizations—are the Fish and Game clubs or leagues of the various provinces, are largely provincial, and are not confined to sportsmen alone, but wide open to the naturalist and all lovers of wild life, whether they hunt with a gun or a camera or the notebook of the scientist, for, in the final analysis, the interests of these are common to all.

The objects of these organizations are to promote wild life research; by an educational campaign to instill into the minds of people the cardinal rules and laws of nature and the necessity of giving to nature the assistance of the human element, where necessary, in order that the happiness which comes from plenty can continue to exist, to secure the passage of the necessary laws to prevent extinction of declining species and to ensure the rigid observance of those laws; to endeavor to maintain the necessary surface water supply, natural cover, trees and food conducive to a bountiful supply of useful wild life, and to control or eliminate those of its enemies which threaten its continued existence.

From this abbreviated outline of objects it will be seen that, in promoting them, these organizations are thereby promoting the welfare of all, irrespective of whether they are directly interested in the preservation of wild bird and animal life or not. For example, agriculturists and livestock men, in recent years, have seen the wisdom and necessity of conserving surface water supplies brought close home to them. Equally so, is the wisdom and necessity of protecting trees from wholesale destruction in order that one of the main sources of surface water supplies should not likewise be destroyed.

As a people we have devoted far too little thought and study to the many forces and factors nicely balanced by nature to make this world a habitable, productive and beautiful land, and we have proceeded in our ignorance to do many things which have worked to our own injury with dire results and at a tremendous cost and enormous loss to ourselves and our country. We must work with nature with knowledge and understanding, not in direct opposition to nature, if we are to survive and prosper.

Apart, therefore from the attractiveness which an abundance and great variety of wild animal, bird and fish life gives to any country, the natural conditions which make such wild life possible are likewise the conditions which give beauty to a country and provide what may be regarded as the basic foundation upon which the productivity of the land rests, for without water and natural shelter the land would become a desert.

For these reasons, among others, Canadians should support organizations like the Fish and Game Clubs, if not by enrollment as active members therein, at least by extending their sympathy, support, and co-operation in achieving the objects for which such organizations exist. In a word, every Canadian should be a protector of Canada's wild life, and alert and ready to assist in maintaining those natural conditions which alone make wild life possible.

## Must Import Grain

Manchuria Will Require Extra Supplies To Feed Populace

For the first time in many years, Manchuria will, this year, have to import grain in order to keep its own 30,000,000 people fed.

Because of lack of rain, it is feared that this year's crops of millet and other grains will be a failure, except in favored districts, and already the government of Manchuria has made arrangements to import 50,000 tons of rice from Saigon, Hongkong and Bangkok. Additional large purchases are contemplated.

The people of Manchuria are not rice eaters, like the Chinese farther south. They subsist normally upon mostly millet and kaoliang, a species of maize.

## Shorter Men For Army

British Regulations Fix Minimum Height For Infantry At Five Feet, Two Inches

The British army is to be shorter. Recruiting regulations issued recently fix the minimum height for infantry at five feet two inches. This is two inches below the old minimum. Cavalry of the line, tank corps, Royal Engineers, army ordnance corps may all accept recruits one inch below the minimum previously stipulated, provided they are otherwise fit.

The war office is determined, in view of the dearth of recruits, to bring the army up to full establishment.

The larger a bird happens to be, the longer its life span.

## Latest Method Detects

## Fingerprints On Cloth

Will Preserve Them Indefinitely After They Are Found

A new technic capable of developing fingerprints left on cloth—much as a snapshot negative is developed—has been added to the New York police department's bag of tricks.

The method, an indirect product of the Hauptmann case, includes the important accomplishment of preserving the original prints after they are found. Chemical baths bring out and fix the prints.

Shortly after the Lindbergh baby was kidnapped, Dr. Erasmus M. Hudson, a specialist in body chemistry who makes fingerprints a hobby, was called to Hopewell, N.J., to examine the ladder used in the crime.

Using an iodine gas process, he found 500 prints where police had found none with the old powder-dusting method. Incidentally, none of the prints was identified.

Dr. Hudson was invited to direct the New York police department's crime-fighting research in this field. The successful use of silver nitrate solutions on bleached linen and other cloths of light shade, and on sulphide on darker fabrics, followed.

The treatment brings chemical transformation of body salts in the wax of which fingerprints are made, causing the tiny lines to become apparent to the eye. The prints may be several years old.

The new technic is superior to the currently widespread method of dusting suspected surfaces with colored powder, it was said, because the powder-dusting is effective only when the wax is fresh.

## Strange Inventions

Weird Array Of Gadgets At Chicago Congress

Termed by their own president as "nuts", the gadgeteers of the 14th annual national inventors congress brought to Chicago a strange array of thingamajigs, hotnannies and doodads.

Among things which attracted spectators who viewed the exhibits of 700 inventors and 3,500 manufacturers and distributors were "tullaby bassinets", a pneumatic ladder, and a hen's nest which separates layers from hars.

If biddy lays an egg she automatically releases a nut which allows her to stroll out into the yard where the layers frolic. No eggs? The only door open to biddy is the one which permits her to enter another yard which big, bad men come to gather chickens for market.

"Many inventors are nuts, as I am," said Albert G. Burns, of Oakland, Cal., president of the congress. "But don't forget it's the nuts who generate ideas which develop into inventions."

In the home life sector also was the "tullaby bassinet" which, at the turn of an electric switch, provides remote control rocking for baby.

## Grading Garnet Wheat

To Indemnify Grain Elevators For Loss Sustained

An appropriation of \$1,500,000 appeared in supplemental estimates submitted in the House of Commons, to indemnify grain elevators which may suffer loss through the separate grading of Garnet wheat. The change in grading is to come into force on August 1, 1935, and the regulation was effected in an amendment to the Canada Grain Act passed last year.

Supplementary estimates amounting to \$18,362,978 were introduced by Finance Minister E. N. Rhodes. Outside of additional appropriations for public works, the department securing the largest votes is national defence, for which more than \$3,000,000 is asked.

## Battles With Reptile

Noted Traveller Secures Fine Specimen Of King Cobra

Lawrence T. Griswold, noted anthropologist who has headed a number of expeditions for the Smithsonian Institute and National Zoological Park of Washington, D.C., arrived at Victoria recently with a fine specimen of the king cobra, which, he said, nearly took his life.

One night in the Philippine Islands Griswold awakened suddenly to find the giant cobra ready to strike. He diverted its attention by throwing a blanket and then with other members of the party killed it. The reptile measured better than 10 feet in length.

Cummings museum, London, contains an elaborate display of witch's remedies collected from Londoners in the last few years.

## Airport Now Obsolete

Thousands Of Dollars Being Spent On Alterations At Croydon

Improvements and extensions costing thousands of dollars are being made to Croydon Aerodrome to cope with the growth in air traffic.

When Croydon was equipped as a main airport at a cost of \$1,500,000 in 1928, it was considered adequate for all London's air services for many years to come.

Since then passenger and goods traffic has increased by over 300 per cent. And air lines radiate to all parts of Europe, the Empire and South America.

In seven years the airport has become too small for its job, although nearly all the home airlines have been transferred to Heston and Epsom airports.

The lay-out of the buildings is to be altered and extended to speed up the examination of baggage and passports. Passengers who have flown from Paris in one and a half hours are sometimes held up for 20 minutes when this baggage is examined. When the alterations are completed in two months passports will be inspected while baggage is unloaded from the airliner.

Methods of simplifying the loading and unloading of baggage to and from motor coaches will be used.

## An Interesting Exhibit

Development Of Transportation Shown In Many Working Models

From a chariot of ancient Rome, the development, up to the present day, of transportation on land, on sea and in the air, was depicted in a transportation exposition at Saint John, N.B.

Hundreds of working models showed the growth of all means of transportation from the crude vehicle of long-ago to the vastly improved and more beautiful machines of to-day. A feature of the indoor exhibit was a miniature display of Saint John river and part of the harbor with tiny ships anchored within, and a group of 74 pictures of sailing vessels famous in the early days of Saint John.

At Union station the latest steam locomotives were on exhibition in their "Sunday best," while at Saint John airport a fleet of Canada's speediest and most up-to-date aeroplanes was shown.

## South Pole Tourist Trade

May Be Winter Sports Playground For Australians In Future

The South Pole, or rather the great ice barrier 700 miles this side of it, is envisioned as the winter sports playground of Australians of the future.

The pole is about 3,100 miles from Melbourne and the barrier 2,400 miles. The imaginative with an eye on the development of safe long-distance air travel, see the tourist of the coming day indulging in snow sports under the shadow of the active volcanoes of Erebus and Terror hunting seal, catching penguins, going kayaking among the bergs and making short morning sled trips "into the blue."

Sir Douglas Mawson, Australian polar explorer, especially has been sketching prospects for development of the Antarctic, including possibilities of initiating a seal fur trade, catching of penguins, and the opening of a winter sports ground.

## Glider Picked Up Wireless

Wireless messages were received in a glider over Dunstable in mail week for the first time in England. Mr. G. E. Collins, who holds the British distance gliding record, made the experiment, and he said afterwards that it was highly satisfactory.

"Solomon," said Mr. Isaacs to his son. "I have decided to insure your life." Solomon looked up piteously. "Fadder," he said, "vy must I burn."

## Aerial Photography

New Camera To Take Panoramic Views From The Air

An invention which may revolutionize aerial photography has been perfected by an optical firm in Germany, it was announced.

The new camera, designed to take panoramic views from the air, is equipped with eight lenses whose combined range embraces the entire terrain at all points of the compass.

At an altitude of 15,000 feet it is possible to photograph an area of 220 square miles, the manufacturers claimed.

## Named By Roosevelt

It was President Roosevelt who first designated it as the White House on his official stationery. T. R. pointed out that nearly every State had an executive mansion (by which term the White House had been previously known) and that the President's home should bear a more distinctive name.

Used For Centuries The Mohammedan lunar year of 354 days is a creation which corresponds to nothing in nature, says an Egyptologist, yet this limping calendar system has been used for 1,313 years—or, as a Mohammedan would count it, 1,364 years.

## GIN PILLS

## Wants Damages

Moose Smashes Automobile And Owner Wants Ontario Government To Pay

Last fall a bull moose ran into his automobile and went off with the radiator shell and a headlight rim, and now Arney Gravelle, of Nantawick, wants the Ontario government to pay for it. He has made formal claim to the department of game and fisheries.

Gravelle said he and a companion were driving a car filled with blankets into a new lumber camp in the Glendale Crown game reserve, north of Sault Ste. Marie, Ont.

A turn in the road brought them face to face with the bull moose. As the car went forward the moose attacked. The first smash sent the license plate into the bush. The second swipe took off the radiator shell and half a fender. Gravelle and his companion were frantic as they tried to hold their seats in the car.

## Will Is Read Yearly

Has Claimed Public Attention Since Probation In 1973

There are doubtless other testaments in the vaults of the Registrar's Office, London, but none which so periodically claims public attention as that of Henry Cloker, probated in 1973, which must be read at Wren Church of St. Magnus the Martyr, Lower Thames Street, whenever a descendant of one of the original beneficiaries wishes to dispose of the property inherited. In the very nature of things the petitions, for reading have become more numerous as time has passed, so that one reading a year takes place, and at every reading, according to the terms of the will, the executors, the Worshipful Company of Coopers, and the Master and Wardens must put in an attendance.

## Aerial Photography

New Camera To Take Panoramic Views From The Air

An invention which may revolutionize aerial photography has been perfected by an optical firm in Germany, it was announced.

The new camera, designed to take panoramic views from the air, is equipped with eight lenses whose combined range embraces the entire terrain at all points of the compass.

At an altitude of 15,000 feet it is possible to photograph an area of 220 square miles, the manufacturers claimed.

## Named By Roosevelt

It was President Roosevelt who first designated it as the White House on his official stationery. T. R. pointed out that nearly every State had an executive mansion (by which term the White House had been previously known) and that the President's home should bear a more distinctive name.

Used For Centuries The Mohammedan lunar year of 354 days is a creation which corresponds to nothing in nature, says an Egyptologist, yet this limping calendar system has been used for 1,313 years—or, as a Mohammedan would count it, 1,364 years.

## Work Is Recognized

Two Westerners Honored At Meeting Of Canadian Seed Growers' Association

As recognition of their outstanding work as seed producers, R. D. Kirkham, Saltcoats, Sask., and W. D. Lang, Cawston, B.C., were made honorary life members of the Canadian Seed Growers' Association, in convention at Edmonton. Further honor was conferred when the two growers were made "Robertson associates" of the organization, a distinction commemorative of Jas. W. Robertson, former Dominion agricultural commissioner.

Mr. Lang has been active in the association for 19 years and Mr. Kirkham for 20 years, during which time the latter has done important work in the purification of Marquis wheat. Bronze medals will be presented later.

## May Take Pets On Train

New Ruling For Passengers Using Sleeping Car Drawing Rooms Or Compartments

Animal lovers may take their pets with them, and not leave them at home or crate them when travelling on trains, it was learned. The Canadian National Railway, the Canadian Pacific and the Pullman Company announced patrons of sleeping car drawing rooms or compartments might take with them, dogs, cats or small animals, or birds, as long as they were not vicious or objectionable. But they must be in suitable containers.

The privilege does not apply to passengers occupying space in the body of the car, and the pets will not be allowed outside of their masters' rooms.

## Had To Think Quickly

A barrister who was sometimes forgetful, having been engaged to plead the cause of an offender, began by saying: "I know the prisoner at the bar, and he bears the character of being a most consummate and impudent scoundrel."

Here somebody whispered to him that the prisoner was his client, whereupon he continued: "But what great and good man ever lived who was not calamitated by many of his contemporaries?"

The song sparrow has about 2,500 feathers.

## WORRIED ABOUT YOUR HEALTH?

Let SASKASAL regain and maintain it

Nature gives to Canada in munificent abundance the natural Mineral Salts found in Little Manitou. These health-giving Salts are recovered and refined by expert Chemists in the form of SASKASAL SALTS.

Thus SASKASAL in turn gives to Canadians in simple form—easy and pleasant to take—the cleansing, purifying, revivifying product of Nature itself. That is the simple story of SASKASAL Salts, so valuable to you in regaining your lost health and maintaining it in joyous vigour. If you suffer from Constipation, Indigestion, Rheumatism, Kidney or Liver troubles—let SASKASAL Salts. At all Drug Stores—50c.

## A WORLD OF FLAVOR

## Stabilization Agency Brings Higher Wheat Prices To Farmers

Ottawa.—George A. McIvor, officer of the government wheat stabilization agency in the Winnipeg markets, stated that stabilization operations had increased wheat prices to farmers since 1939 well over \$15,000,000. He estimated the price had been increased on an average 15 cents a bushel by government stabilization during those years.

Mr. McIvor was giving evidence before the House of Commons committee on the Canada grain board bill. During the forenoon and night sittings of the committee he had been questioned by members of the committee as to operations of John I. McFarland, who had charge of the stabilization.

Canada since 1930 had exported 1,076,000,000 bushels of wheat. That would mean \$150,000,000, it was figured. In addition the price of wheat sold to domestic mills for flour also carried the higher price.

"I think it is a wild guess," said Hon. Charles Stewart (Lib., Edmonton). "I do not mind telling you I do not think you saved the farmer anything of the kind. You only sold 50 per cent. of the total sales."

"Yes, but our operations raised the price of all the sales."

"You took the wheat price, didn't you?"

"Yes, but we had considerable to do with regulating the wheat price."

"We could throw our surplus into Lake Superior and still be ahead of

the game," interjected E. E. Perley (Con., Qu'Appelle), which caused heated denials from John Vallance (Lib., South Battleford), Mr. Stewart and Hon. J. L. Ralston (Lib., Yarmouth-Sheburne). Mr. Ralston had been the principal questioner of Mr. McIvor throughout the sittings.

Witness reiterated that although their books showed they held grain and options to the extent of 228,000,000 bushels, he was confident the supplies of Canadian wheat available were less than 200,000,000 and therefore the surplus would be less by that amount.

"The grain trade is short in the market," he said.

"Do you know it is the grain trade," Mr. Stewart asked.

"Well, no, someone is short."

Replying to Premier R. B. Bennett, the witness expressed the opinion the future market under present conditions was injurious to marketing of the wheat crop. On the other hand he saw no reason why the export business could not be done through export houses.

Government guarantees to the banks to cover the market supporting efforts of Mr. McFarland ranged from a maximum of 75,000,000 bushels of wheat in 1932 up to a maximum of 238,000,000, the commons committee was told. Guarantees were revised from time to time on joint recommendations from the bank and Mr. McFarland.

### Peace Vote

Strong Opinion In Britain For Adherence To League Of Nations.

London.—Fifteen figures in Britain's great unofficial peace ballot, announced recently, showed more than 11,000,000 persons expressed their desire to have this country remain in the League of Nations, while almost as many urged general reduction of arms by international agreement.

The figures on the several questions submitted followed:

For continued adherence to the league, 11,090,387; against, 532,853.

For arms reduction, 10,770,480; against, 862,776.

For all-around abolition of military and naval aircraft by international agreement, 9,553,558; against, 1,689,786.

For prohibition of the manufacture and sale of arms for private profit, 10,417,329; against, 776,415.

For economic sanctions against an aggressor, 10,027,608; against, 635,074.

For military sanctions, 6,784,368; against, 2,351,981.

### Gasoline Price War

Montreal.—From backyards and scrap heaps in Montreal ancient types of automobiles are now seen puffing along the streets. The gasoline price war has brought the price within reach of most people and those who could not afford to run their cars before are now bringing them out of storage and filling them up with the cheap fuel.

## Bonus Is Suggested To Stimulate Home Construction Program

Ottawa.—Suggestion for the payment of a 20 per cent. government bonus towards the construction of homes in Canada was heard in the senate from Hon. Raoul Dandurand. The utilization of the fund, which might be increased, would mean a total expenditure of \$500,000,000, the Liberal leader added.

Criticizing the \$10,000,000 housing measure, he declared the leasing of money under the bill would provide little help in the construction industry and the building trade, but the payment of a bonus would bring results.

Money was available to the extent of millions of dollars in banks and financial institutions for investment at four and five per cent., but what was required was an encouragement to the investor at present in fear of small returns.

Senator George P. Graham (Lib., Brockville) did not think much money would be expended under the scheme. He did not think a loaning

institution was going to lend 60 per cent. of the cost of a building and land knowing the government was in it and that the cost paid for was up to 80 per cent.

Rt. Hon. Arthur Meighen, senate leader, said Senator Graham would be correct if he had in mind only a commercial banking institution created for the purpose of making money. But the bill contemplated co-operation with the provinces and that the provinces would establish lending institutions.

"This was the method the Dominion was taking to assist provincial and municipal schemes. The measure included some slum clearance and the erection of better houses for low wage-earning people in those districts."

"We are either going to have a housing policy or we are not, and I fancy the commons committee composed of members of both sides of the house had probably done the best that can be done," Senator Meighen stated.

### Agriculture Research

Needed To Solve Present And Future Problems

Edmonton.—Agricultural research will be needed in Canada to solve its present and future problems, and such research in turn will require all available resources, said Dr. J. M. Swaine, director of research for the Dominion department of agriculture, in an address at the closing session of the technical agriculturists convention here.

Co-ordination in this, as in other departments, is essential to success, Dr. Swaine declared, and through co-operative committees the work of the various governmental and institutional research bodies is now being developed along more practical and unified lines.

Dr. Swaine denied that scientific research is to be feared on account of the greater production that its discovery will make possible. "Improved distribution of products will take care of the increased production," he said, adding that agricultural research in this country is being directed more particularly toward improvement in quality and reduction of operating costs.

### Vegetable Imports

Agricultural Products Lead Other Groups For May

Ottawa.—Agricultural and vegetable products led all other groups of imports during May and were valued at \$13,389,000 against \$10,329,000 in the corresponding month of last year, the Dominion bureau of statistics reported. Canada's total imports during May were valued at \$54,548,000, compared with \$52,857,000 in May, 1934. The United States was the largest supplier, with goods to the value of \$28,256,000 against \$30,063,000 last year, with the United Kingdom next with goods at \$12,359,000 compared with \$12,030,000 in May, 1934.

### Paris Deluged By Rain

Downpour Lasted Half An Hour And Disrupted Traffic

Paris.—A deluge said to be the most severe in memory fell on Paris, inundating streets, flooding cellars, forming veritable lakes in low sections and disrupting traffic.

The downpour, which lasted 30 minutes, sent pedestrians rushing to cover and cleared car terraces.

Versailles was hit by the same downpour. Many trees were uprooted and the famous Rose Gardens were transformed into lakes.

### Ban Submarine Warfare

Britain Ready To Discuss Naval Issues With European Powers

London.—Great Britain, with Germany's promise never again to engage in unrestricted submarine warfare, is ready to discuss naval issues with France, Italy and Russia.

Prime Minister Stanley Baldwin informed the House of Commons that the three had been invited to send delegations to London, but evaded questions as to whether all invitations had been accepted.

### Chinese Boy Finds Gold

Canton, China.—Reports of an extraordinary find of white quartz rich in raw wire gold and of nuggets, is exciting the authorities here. The find is attributed to a small Chinese boy employed as a herdman by a farmer named Tsai residing on Tad-up mountain in the Upping district of this province.

### GIFT DECLINED

It has been announced that Lady Houston's offer of \$1,000,000 for the air defence of London has been declined by the Chancellor of the Exchequer. Above is a picture of Lady Houston who is very much interested in all matters pertaining to England.

### Competition From Japan

May Have To Adopt Other Methods To Complete With Cheap Products

Paris.—Possibility of using Japan's own industrial methods to compete with her cheap products was raised at the convention of the International Chamber of Commerce.

Sir Arthur Balfour of Great Britain told the 1,000 delegates from 35 countries although Japanese competition may have individual business, he was convinced it "has great possibilities for international economic good."

Henry Laureys, dean of the Montreal School of Higher Commercial Studies, is the Canadian delegate.

British and American business leaders said after the session in informal discussion the only means of meeting Japan's competition was to study her methods of "rationalization of industry," whereby national co-operation turned a whole industry into a single company instead of dozens.

Walchand Hirachand, Indian business executive, startled the delegates by stating India would be a powerful industrial nation if England stopped "forcing India into agriculture" in order to protect the mother country's industries.

### Sir Robert Borden

At Eighty-One He Gives Formula For Long Life

Ottawa.—Eighty-one years old, Rt. Hon. Sir Robert Borden celebrated his birthday here recently. Abundant work, and little worry was the formula given by Canada's "grand old man" for a long life.

Sir Robert was born at Grand Pre, Nova Scotia, on June 26, 1854. "No one can deny that confused and very difficult conditions confront the nations to-day, but, even at my advanced age, I am still a confirmed optimist; and I not only trust but believe that all will be well with the world," Sir Robert said in an interview. "This is quite consistent with my belief that certain anomalies in our social order ought to be and will be corrected."

### Radio For Motorcycles

Verdun, Que.—By Radio-equipped police motorcycles capable of receiving messages transmitted from the Montreal police radio station, were put into service here making Verdun the first city in Canada to use the radio system on police motorcycles.

WHEN RAMSAY MACDONALD RESIGNED

Our photograph shows Mr. Ramsay MacDonald leaving Downing Street for Buckingham Palace when he placed his resignation in the King's hands. With him is his son, Malcolm, who has been given a post in the new Baldwin Cabinet.

## Disappearance Of Stockyards Predicted In Transition Period

### Move Voted Down

Combined Strength Of House Rejects Social Credit System

Ottawa.—Social credit lashed across the federal politician stage for a few brief minutes but was crushed under the combined voting strength of Liberals and Conservatives in the House of Commons.

Alfred Speakman, United Farmer member for Red Deer, proposed a motion to reorganize the financial system along social credit lines, the Dominion assuming control of public credit, financing public works with printed money and social dividends to all persons at the age of 60 to increase the purchasing power of the nation.

Speaker J. L. Bowman put the motion to the house and it was drowned under a thunderous wave of "no's" from Liberals and Conservatives. Progressives did not muster enough members to force a recorded vote.

### The Farmer's Difficulties

Prince Of Wales Says Industry Never Knows What Day Will Bring Forth

London.—The Prince of Wales told a delegation of 200 representatives of the Agricultural Benevolent Societies "the farmer is probably the most beset with difficulties of any man in England."

Receiving the delegates at St. James' palace, the prince said: "My experience in farming on the Duchy of Cornwall estate and my ranch in Canada has taught me a good deal of the practical difficulties of the farmer's life." (His Royal Highness' ranch is at High River, Alta.)

"The industry never knows what tomorrow will bring forth, for in addition to economic troubles, the farmer has always the uncertain forces of nature to contend with. They can easily exhaust his slender capital and cause complete ruin of a life-time's work."

### Floods In North

Railway Line In Peace River District Reported Blocked

Edmonton.—Northern Alberta railway line near Peace River district was reported blocked at Wadsworth as floods in the Lesser Slave Lake region continued. Region north of Grouard was reported inundated for miles and farmers were moving mail, freight and even hogs by boat to Big Meadows from where wagons were able to reach the railway.

Flood waters halted the Northern Alberta Railway train which left Edmonton for Peace River, near Slave Lake village.

### Zeppelins To Be Faster

Berlin.—Construction of bigger and faster Zeppelins, capable of a round trip from Germany to North America in less than a week, was announced by Karl Christiansen, manager of the German-Zeppelin Lines, Ltd.

## New Brunswick Elections Result In Liberal Victory

Saint John, N.B.—Liberal tides that swept Nova Scotia and British Columbia in 1933, spreading to Ontario and Saskatchewan last year, flooded New Brunswick with a turn over unprecedented in the history of this province.

The smashing victory of 43 Liberals, including their leader, A. A. Dymally, left the Conservative party with only five seats in the next house. Premier L. D. Tilley and every member of his cabinet met defeat. From a total of 14 at dissolution, membership of the former opposition has been increased by 29.

The handful of Conservatives who will face more than two score Liberals across the legislature floor are Hon. F. C. Squires, speaker of the last house; G. W. Perry and E. W. Melville, elected in Carleton and Robert McAllister and A. C. Smith, elected in Saint John county.

Defeated government members are Mr. Tilley, premier and minister of

Edmonton.—Gradual disappearance of stockyards, important changes in grading systems, and a new marketing policy to dispose of the exportable surplus of livestock were forecast in a paper by E. N. Arnsperg, acting chief of the division of co-operative marketing at Regina, which was presented at a meeting of the Canadian Society of Agricultural Economists.

Mr. Arnsperg said that the present is a transition period in regard to marketing policies and practices, and he did not look for much progress in the way of co-operative schemes. One of the serious difficulties met by the latter, he said, is due to motor truck operation.

"The whole situation is unsatisfactory from the standpoint of co-operatives," the Saskatchewan expert declared. "Motor trucks are working against co-operative marketing of livestock by facilitating direct shipping to the plants. Producers continue to patronize the plants and truckers who are interested only in the number of loads they can carry for the sake of immediate advantages. Some get 50 per cent. of these animals by motor truck operation."

Packing companies are usurping a function that rightfully belongs to the producers, Mr. Arnsperg claimed, in purchasing cattle and lambs for finishing, and this is giving considerable concern at the present time. The Alberta policy of placing stock with farmers for feeding and finishing was referred to approvingly, but general adoption of such a plan is hampered by lack of railway rates, it was pointed out.

Mr. Arnsperg thought that grading of livestock on the rail would soon be generally adopted in Canada, a number of plants having already done so. He was of the opinion that such a change would have a beneficial effect of prices.

### Peace Seems Nearer

France And Germany

Paris.—Premier Pierre Laval declared he was willing to negotiate with Adolf Hitler on a "peace arrangement" for submission to all European powers, if it appeared "really possible."

"If the eventualities of a Franco-German agreement, which would respect the integrity of all powers, appears really possible soon," the premier told the senate foreign affairs committee, he "would not hesitate to do his duty in favor of general peace and reconstruction of Europe."

Hitler's offer of Germany's "peace and friendship," without any territorial demands, in his recent Reichstag speech, Laval indicated, inspired his remarks.

### C.P.R. Earnings Up

Montreal.—Total earnings of the Canadian Pacific Railway Company for the week ending June 21 were \$2,375,000, an increase of \$230,000 over \$2,145,000 over the corresponding week last year.

lands and mines; Hon. W. H. Harrison, attorney-general; Hon. Lewis Smith, minister of agriculture; Hon. G. H. I. Cockburn, president of the executive council; Hon. H. I. Taylor, minister of health and labor; Hon. A. A. Stewart, minister of public works; Hon. A. J. Leger, provincial secretary-treasurer, and Hon. E. A. Reilly, chairman of the New Brunswick electric power commission and minister without portfolio.

Leading a campaign for the first time, Mr. Dymally polled the largest vote in Kent. Mr. Tilley, contesting his old constituency of Saint John City for the first time as premier, and the attorney-general, went down in the same riding.

The Liberal sweep was so complete nine Conservative candidates lost their deposits in Gloucester, Kent and Madawaska. Two independents in the latter constituency, only one where straight Liberal-Conservative fights did not prevail, also met the same fate.

THURSDAY, JULY 4, 1935.

### NOTES AND COMMENTS

The town band shows decided improvement in its playing. Their program on Monday at the post office corner was appreciated. The bandmen help to make life a little brighter for others as well as themselves.

Church attendance is very poor at the commencement of the holiday season. Two Protestant churches last Sunday recorded an attendance of 16 in the morning at one and 21 in the evening at another.

"He is not fit for riches who is afraid to use them."—Ex.

Week-ends usually are productive of a crop of accidents. Early Sunday morning a party returning from Fernie in a 1935 Pontiac car were brought up with a severe jar when the car apparently left the highway and collided with some tree stumps.

Imagination and originality are important requisites for the development of even the smallest retail business. There are always possibilities for development, but brain power must be used to discover and utilize them. Consider your job the most important thing and have a mark to aim at. Steady effort will bring results.

Flags flying on public and private buildings on national holidays arouse a feeling of pride. National and civic pride are commendable virtues, for one recalls the words:

"Breathes there a man with soul so dead  
Who never to himself hath said,  
'This is my own, my native land.'"

The line of least resistance is the easiest to follow, and the majority follow it. But they regret being told so. It is easy to discipline others, but much harder to discipline ourselves. At least we think so.

The political situation in Rocky Mountain constituency is as foggy as ever. G. Cruickshank, Independent, states he will run against Donald J. McNeil, recently nominated Liberal candidate. The Conservatives will not nominate a candidate, and some have expressed their intention of supporting the Liberal candidate. If these candidates both contest the seat, the result will likely be an easy victory for the Social Credit or Communist candidate. This constituency under much representation will still be out in the cold, instead of being represented on one of the major political parties. With four running, considerable campaign energy will be spent to no purpose, as far as party supporters are concerned. The only nothing convention so far reported is that of the Liberal party.

See your work in the light of service rendered to your fellow humans, rather than as a method of making money, and you immediately raise your work from that of a job or a business into the classification of an art and a profession. Moreover, your job then becomes your joy!—John Edwin Price in "God, Your Job and You."

Cheer up! You are a good sized individual for the place you were intended to fill.—J. E. P.

At the bank on paydays there is usually a scramble for premier positions for collecting alms from the miners as they leave the bank with the proceeds of the fortnightly cheques. Last Saturday two old fellows with only a leg apiece were a little late in arriving on the job or else the other fellows were very early, for the premier positions just inside the bank doors were seized by a chap selling ash trays, and the other side of the lobby a political party was out with the money box for contributions. So the one-legged men had to content themselves with the sidewalk, while the football club also had a young fellow out with the box, making a total of five.

"Our idle days are Satan's busy days."

People have occasionally questioned the propriety of this form of making collections. It has become a practice from continued custom. Certain mendicants are able to secure legal protection to beg, as the following clause from the criminal code indicates:

"A beggar may solicit alms if he has a certificate signed within six months by a priest, clergyman or minister of the gospel, or two justices residing in the municipality where the alms are being asked, that he or she is deserving of charity."

Just under what category organizations would come a knotty problem.

"Fortune favors the brave."

Prosperity will be helped in its return by every individual trying to do himself good. The more individualism the greater progress. You have to be other than sheep or a mere "yes-man" to progress. The keen competition of the automotive industry is a demonstration of the progressive results of individualism. Charles Kettering, chief technical expert for General Motors, states: "When we try to stabilize products and prices and whole industries, and think we can get automatic profits, we're trying to stabilize life. And it can't be done." There's something to think over. When golden promises are held out by those who tell people they can guarantee economic security. It can't be done. It never has and never will be, for you cannot change the fundamental principles of human nature or natural laws.

The sharp rise in relief expenditures in the latter years of the depression is due more than you might think to the agitation of Communist-led groups. No issue is too small to fight for; brooms for housewives in Seattle, coffee instead of cocaine in Chicago, an anti-spaghetti crusade in a Scandinavian district. The Communists have learned that aggression pays.—From "The Communist Party" in the magazine "Fortune."

A radio audience has an easy exit—it can always turn the dial from the atrocious jazz that is far worse than the music of savage tribes—and other objectionable noises and blah.

"Mirth and motion prolong life."

Newspapers have many subscribers who faithfully pay promptly, every year. Checking over The Journal's list since it commenced publication in 1921, six years before the present proprietor purchased the business, are found many faithful names who from year to year have regularly credited against them the annual subscription of \$2.00. It is the steady, faithful subscriber who pays in advance who lightens the job of publishing a weekly newspaper.

The Wise  
Old Owl

SENTENCE STIMULANTS

(By John Edwin Price)

Do something for God and make it possible for Him to BE something to you.

While one cannot have religion without belief, the importance of creeds is being subordinated to deeds.

Real religion is not afraid to don overalls and go to work in the hope of making earthly life more interesting, enjoyable and just.

Practical preachers, while not forgetting that a good life with faith is the best passport to heaven, are helping people to bear up and live abundantly here and now.

Successful clergymen, while not minimizing sin and its consequences here, and, if need be, hereafter, do not so much scold people for being worse than they should be, as they encourage and inspire them to be better than they are.

Quotation: "Show me the happy worker and I will show you life's happy warrior."

**Striking while the iron is hot** is a characteristic of the West that has gained the admiration of the rest of Canada. And so there is little surprise in the announcement that the Board of Trade at Invermere, B.C., has leased the bungalow camp at beautiful Lake Windermere for this summer, in anticipation of increased tourist traffic to the Canadian Rockies, which has been generally forecast in Europe, the Orient, and the United States. The camp, which is being taken over by small but energetic Invermere, is one of the most delightfully situated in the Canadian Rockies. Built originally by the Canadian Pacific Railway, this camp has been successfully operated for the past several years as a private camp for girls. In the centre of an ideal vacation district, it is easily reached by main mountain highways. The famous Banff-Windermere road leads to it, a good alternative route being through the mountains from Cranbrook. The lake averages about 45 degrees in the summer and ideal for swimming and boating. Excellent trout fishing can be had in several creeks and smaller lakes near by and the lake itself has landlocked salmon of considerable size. Within a day's ride the celebrated Lake of the Hanging Glacier, with six spectacular glaciers all concentrating in one moraine with an ice wall several hundred feet high which drops a continual succession of small icebergs into the lake. The camp is a particularly good centre for a whole summer's rest and exploration, because many are the side trips that can be made by car, mountain-bred ponies, or on foot to adjacent spots of beauty or historic interest. There is accommodation for 48 guests in the camp, which consists of a large main building, with wide veranda, and of separate small bungalows, equipped with single beds, stove, clothes closet, nice furniture, running water, and electric lights. A double bath-house, with hot and cold running water, contains separate bath rooms.

### A BEAUTIFUL DAY—BUT NO FISH!

Last Friday the office staff cast aside the intricacies of setting type and writing locals and took a day off. The most relaxing sport known is that of angling, of which there are plenty of opportunities in this district—if you know where to fish. It was a delightful afternoon, the water was running clear as crystal in the south fork, everything seemed right with the world as we sat down to enjoy a picnic meal, but—after four hours' persistent effort we landed up where we had started with a big zero as the net result of the afternoon's persistent effort in wading shallows, climbing over knolls to reach likely looking pools, catching grasshoppers for bait and trying every known lure to entice the trout to bite. Not a thing done! But in the lovely scenery of the south fork district there is reward even if you catch no fish. It was a treat to enjoy the sunshine and shadow and to ponder on the beauties of Nature which usually are taken so much for granted that appreciation is forgotten.

### Junior Soccer Notes

After having won their first three games the local juniors suffered their first defeat when they were defeated 2-1 at Hillcrest, Tuesday.

A return game will be played at Coleman, Friday, July 5. Kick-off at 6:30 p.m. Admission by tag 25c. The juniors will play at Michel on Sunday.

The junior football club expresses its appreciation for all donations received in its recent campaign to secure funds for uniforms.

Mr. and Mrs. J. Krywolt and family were Lethbridge visitors this week.

Mr. and Mrs. Walter Nelson and family, accompanied by Mr. and Mrs. J. Hopkins sr. and Dolly, motored to Camp Lister, B.C. during the holiday returning Wednesday.

### Car Smash To-day

An accident occurred on the road near Sentinel crossing at noon today when a 1933 Plymouth coupe driven by a party from the States and a 1935 Pontiac sedan owned by A. Harry and driven by John Kappelka collided. Both cars were badly smashed and one lady was brought to the local hospital where she was treated for facial bruises. Others in the collision received minor bruises.

### WANTED—MAN TO QUALIFY FOR GOOD PAY POSITION

Will personally interview man willing to work hard for good pay position in Electric Refrigeration and Air Conditioning business. Prefer man with fair education, mechanically inclined, none employed. Must be willing to devote some spare time at home to preliminary training to become installation and service expert. Write, giving age, phone, present occupation.

# Directory of Enterprising Business Houses in "The Pass" Towns

THE JOURNAL THANKS ITS SUBSCRIBERS—MORE POWER TO THEM!

The Journal appreciates the renewal of a number of subscriptions during the past month, which is an evidence of the support of Coleman people in our efforts to give Coleman as good a weekly paper as possible.

In this connection, without any spirit of boasting but to show that the weekly paper occupies a worthy place in community life, the following is printed, the writer being John Edwin Price, a newspaper feature writer who has attained success in his field of service:

The Home Town Editor He Puts You on the Map (By John Edwin Price)  
You had hardly let out your first yell on this terrestrial sphere before the local editor ordered the fact of your arrival announced to a baby-loving world.

When you reached the age of three or four and had your first birthday party with invited guests, your friend, the editor, told all and sundry you was there and what a fuss they made over you.

When you got on the honor roll at grade school he let all your admiring friends and neighbors know about it. If you got into any minor scrapes he apparently forgot about them as soon as he was told, for he wanted to play up the things which might make you great.

All through your high school course he was keenly watching to see if you did anything worthy of note in athletics, letters or debate. And when you finally graduated he again seized upon the opportunity to put your name in print.

If you decided to go to work then instead of going on to college he heralded the fact in such a manner that made any prospective employers realize that there was an ambitious lad who wasn't leaning unnecessarily on the folks. He wanted all whom it might concern to know that if work was to be done, here was a live-wire all set.

When the supreme object of your heart's desire was won your editor-friend seemed to know about it almost as soon as the "lucky" girl and wanted all other aspirants her sole attention to lay off as he printed the announcement of your engagement. Once more you were the conquering hero, or thought so. The girl may have had other ideas on the subject.

If after that you accomplished anything worthy of note, the world was told in letters bold: "HOME TOWN BOY MAKES GOOD!"

When those near and dear to you were, by death, taken out on "The Great Adventure" the Chief of the Columns apparently forgot their vices and proceeded to laud their virtues and remind the world of their fine family connections—including you.

When illness overtook you he let all the neighbors know so that maybe the power of their prayers could be added to the forces of medicine.

And some day (should he perchance outlive you as he has so many others) he, being kind and faithful unto the end, will once more use good paper and ink for you. He will probably tell mankind far and wide that one has passed who was a useful and worthwhile addition to the race, that you have gone to join the glorious company who have become the "guests of God."

## The Churches

ST. PAUL'S UNITED CHURCH

The sermon subject at the morning service will be: "A Good Man, Barnabas."

The Sunday school session is withdrawn till further notice. As many as possible of the children are urged to attend the morning service.

In the evening the sermon-subject will be: "The Publican's Prayer." During holiday times do not forget God. An hour in the Sanctuary will make the days happier.

## THE SALVATION ARMY

Major Richardson will not be coming to Coleman, as previously announced, but Lieutenants Fitch and Pierce from Salvation Army college in Toronto will take charge. The new officers thank the people of Coleman and district for their support and state they come with the desire to serve God and the people and thus extend the Kingdom of Christ on earth.

Friday at 7 p.m. special meeting for young people. Sunday school at 3 p.m. every Sunday. All are invited to the Sunday night meeting at 7.15 preceded by an open-air service.

Sunday, July 7th, the Salvation meeting will be preceded by fifteen minutes of music and song. Come and enjoy a real Gospel service. Watch the Army notice board.

## Local News

Mr. and Mrs. Norman Smith, of Lethbridge, are guests at Mrs. J. Derbyshire's.

Dr. and Mrs. McCallum and daughter Marion, of New Dayton, have been the guests of Mr. and Mrs. Luke Lindoe for the past week.

Mr. and Mrs. J. Kinnear, accompanied by Mr. and A. Beveridge, motored to Coalhurst and Lethbridge on Monday.

Mr. and Mrs. J. Ford visited Pincher Creek on Monday, and were accompanied by Mr. and Mrs. Len Watkins, of High River, who had been spending the week-end with the latter's parents.

The Canadian Legion held a social evening on Friday in the Oddfellows hall, and on Sunday held a picnic at Crown Nest Lake. Cool weather and rain on Sunday caused an early return to town in the afternoon of the picnics.

FOR SALE—1 Moffat range, complete with water front. Kitchen table and chairs; 6-piece breakfast suite; linoleum. Apply Mrs. M. Clifford, Coleman.

## To Whom It May Concern

Please take notice that H.H. McKinnon is no longer connected with the Canadian Commercial College and we shall not be responsible for any monies paid to him.

Signed,  
Canadian Commercial College

## Refrigerators

for  
**Comfort and Economy**

Besides keeping your food from Spoiling during hot weather, many little economies in saving that otherwise would be wasted are possible with one of our reasonably-priced Electric Refrigerators. Mr. Hay, our salesman, will gladly explain all details as to prices and terms.

WORLD HAPPENINGS  
BRIEFLY TOLD

It was officially announced 102 persons lost their lives in the munitions factory explosion at Reinsdorf, Germany, June 13 and 723 were injured.

Britain has invited Russia to naval talks. It is suggested Russian naval experts shall come to London after visits by French and Italian delegates.

Total gross agricultural revenue of British Columbia in 1934 is estimated at \$39,826,141, compared with \$36,647,007 in 1933, in statistics released by the provincial government.

An aerial traffic survey, to determine whether traffic cops could help unsmear New York's crowded Sunday motor traffic, was made by First Deputy Police Commissioner Harold Fowler.

The Cuban bill amending the Franchise Act passed through the House of Commons. It would prevent judges from upsetting decisions of franchise registrars without positive evidence.

Prof. Karl Barth, of the University of Bonn, was indefinitely suspended from the chair of theology for his refusal to take an immediate and unconditional oath of personal loyalty to Chancellor Adolf Hitler.

Salvage experts have made plans to attempt to locate the wreck of the Lusitania, sunk by a German submarine 20 years ago. A. A. Batic, surviving officer of the vessel, will participate.

A bleached skeleton, identified as that of Herman Nohthagen, Spiritwood, Sask., farmer, was found two miles from his farm by Joe Doucette, of Spiritwood. Nohthagen had been missing from his home since June 1, 1934.

Accompanied by nine college students, two sheep and 60 chickens, Captain Bob Bartlett, author and explorer, sailed from New York in his schooner, Elfin G. Morrissey, on the first leg of his ninth trip to Greenland.

Canada's military forces are represented in the supplementary estimates tabled in the House of Commons by estimates for all three arms of the service. For the militia the appropriation is \$1,651,000; for the naval service, \$145,000; and for aviation, \$1,302,900.

## An Amazing Apparatus

Enables One To See And Read With Eyes Closed

A Canadian physician's device which enables one actually to see and read with the eyes tightly closed, is attracting much attention at the scientific exhibit of the American and Canadian Medical Association at Atlantic City, N.J.

The apparatus is the work of Dr. A. Howard Pirie, of the Royal Victoria Hospital, Montreal, and is based on his discovery that X-rays, contrary to hitherto prevailing belief, can be seen by the human eye.

Physicians have pressed their closed eyes against an eye-socket in front of the X-ray tube and, to their amazement, have been able to read words and see pictures just as though their eyes were open.

Dr. Pirie is using it in detecting the location of foreign bodies lodged in the eye and to determine whether a damaged condition exists in the retina.

## Origin Of Pall Mall

Street Named For Game Played In The 17th Century

Most people have heard of a street in London called Pall Mall, and this is how it got its strange name. In the 17th century there was a very popular game in London called Pall Mall, identified with croquet which is still played to-day. It was popular with most of the gentry. The object of the game was to drive a ball along a straight alley and through an elevated ring with a mallet. The alley for pall mall was hardened and strewn with pounded shells so as to present a perfectly smooth surface. The game has completely died out, for there is no trace of it for centuries, and the only relic of the game is in the name of Pall Mall street.

Editor's Son: "Did you ever have a great ambition when you were a boy of my age?"

Editor: "Certainly. My one wish was to wear long pants. I got my wish, because, if there is anyone else in this country that wears his pants longer than I do, I'd like to meet him."

London will provide facilities for "family" bathing at public pools.

## World's Greatest Racing Classic

START OF INDIANAPOLIS SPEEDWAY RACE

ABOVE: SCENE IN THE "PIT" A CAR IN FOR GAS LEFT: KELLY PETTILLO, WINNER, AND HIS MECHANIC

Unfortunately the average spectator at the annual Indianapolis Speedway Classic is unable to witness much of the tense drama of the race, which takes place in those little concrete-walled boxes known as the "pits", located on the "apron" of the track near the starting point. Here the "teams", composed of a dozen men—a necessary organization for every entrant—perform their duties in an atmosphere tense with excitement but with the precision of a well-drilled stage show. Without their help no driver would stand a chance of winning.

There is the directing genius behind the strategy involved in this four-and-a-half-hour contest. Whirling around the two-and-a-half-mile rough brick oval at speeds approaching 150 miles an hour, these seers reeling from the thunder of their motors, the fumes from the engines, and the eye strain, the drivers lose track of their position and their speed.

It is the pit men who keep them informed on these important matters, and advise them regarding strategy through a complicated system of signaling. When to come in for water and gas, and who the leaders are at the moment are among the many pieces of information that the driver must depend upon his pit crew for.

The operations in the pit are as thrilling, at times, as the actual race itself. A car slides onto the apron and stops in front of its own pit. Half a dozen men leap the low concrete wall, each concentrating on a definite job. The cap is off the radiator in a second and a stream of cool water is flowing in gasoline is already being poured into the tank; tires are examined; and two men lift

the hood and their expert eyes and ears can tell in a split second whether all parts of the engine are synchronizing.

One or two A.A.A. officials dash up. The pit crew gives them an anxious glance, for their inspection may mean loss of many precious seconds—possibly elimination from the race. These officials have the authority to order adjustments, and, if in their judgment the car has a defect, to order it from the race as a precaution of safety for all concerned.

Kelly Pettillo won this year's race, setting a new track record of 106.24 miles per hour. Each of the two times Pettillo stopped at the pits, he was seen to sway in his seat, not yet recovered from the terrific car-swing at high speed. Peter DePaolo, his pit man, shouted advice into his ear. DePaolo's deafened ears and within a minute or so Pettillo was back on the track with a fresh supply of gas and water, and his engine in perfect tune.

Pettillo frankly stated after the race that much of the credit for his performance was due to two factors—his pit manager and his tires. The winner said he was tempted several times to "burn up" his tires early in the race to catch the several drivers ahead of him. "I knew my Firestone tires would stand any speed my car could go," he said. "But I had my instructions from Pete DePaolo. He worked out the plan of campaign and I followed it."

DePaolo signalled instructions to Pettillo on almost every lap of the 200.

In the pits, too, watching and checking car performance, is the engineering genius of the country. The recent race marked the sixteenth consecutive contest in which Firestone tires had been on the winning car. Firestone engineers and designers were in the pits throughout the race, checking every phase of the cars' performance. The drivers buy and pay for their tires, and have for years. Firestones were on all cars that finished and there was not one tire failure. With new records each year, the problem for tire and motor car engineers is ever new.

## FASHION FANCIES

Enables One To See And Read With Eyes Closed

A Canadian physician's device which enables one actually to see and read with the eyes tightly closed, is attracting much attention at the scientific exhibit of the American and Canadian Medical Association at Atlantic City, N.J.

## Little Journeys In Science

## HUMIDITY

(By Gordon H. Giest, M.A.)

Humidity not only has an important bearing on the comfort of man but it has also a marked effect on our daily affairs. The story of humidity begins with the fact that water vapour is a normal component of the earth's atmosphere. Water vapour is simply water in the gaseous state. It is invisible and we cannot become aware of it directly by our senses. Unlike all the other components of the atmosphere, nitrogen, oxygen, and the rest, the amount of water vapour present in the air varies greatly from time to time and from place to place. It is sometimes present in the air to the extent of 5 per cent. by volume, and occasionally the amount is too small to be measured.

The air is furnished with water vapour by the evaporation of water in liquid or solid form, as contained in oceans, lakes, rivers, snowfields and plants. The amount of water vapour which the air can hold depends upon the temperature. Warm air can hold more water vapour than cold air. Strictly speaking, the temperature at which the air is saturated can occur in a given space regardless of the presence or absence of other gases, and in scientific language we say that the air is saturated with water vapour when it contains the maximum possible amount of the vapour.

If the air is fully charged with water vapour, or in other words saturated, any drop in temperature will cause some of this gas to change to a liquid or solid. This is due to the fact that cold air cannot hold as much water vapour as warm air. In science we say that some of the water vapour has condensed, and the condensed water forms a fog or cloud in the air. Eventually the process may lead to the production of rain or snow.

With the aid of an instrument known as the hygrometer, scientists measure the relative humidity and express this value in percentage. Thus if at a certain time the air is charged with water vapour to half its value, the relative humidity is said to be 50 per cent. When the air is saturated with water vapour, the relative humidity is 100 per cent. Relative humidity plays a very important role in human affairs because it is one of the chief factors in the production of weather. When the relative humidity is low, evaporation takes place rapidly from all moist surfaces exposed to the air. When the relative humidity increases, evaporation slows down, and when it reaches 100 per cent., evaporation stops. The seasoning of lumber, drying of fruit, vegetables, fish and the family wash, as well as many other common operations, require comparatively low relative humidity of the air for their rapid performance.

Humidity has a marked effect upon human comfort. The saying that "it's not the heat but the humidity" contains a great deal of truth. Though it is not the whole truth, our sensations of heat and cold depend upon the rate at which heat leaves the body and this is regulated, so far as atmospheric factors go, by the cooling power of the air, which depends upon three things: temperature, wind and humidity. The thermometer may climb into the nineties, yet if the humidity is low we remain comfortable, especially if a breeze is blowing. Such temperatures combined with high humidity are unbearable.

Europe has 11 ruling monarchs left—10 kings and a queen. There are only 17 ruling monarchs in the entire world to-day.

If you're in doubt whether it's a weed or a useful plant, in nine cases out of ten it's a weed.

Parchment is different from leather in that it is not tanned.

Snow in South Africa

Snow fell at Durban, Natal, South Africa, June 13, for the first time in the memory of living men, and several lives were lost in the strange mixture of weather. The inhabitants of the city, noted for its hot, humid climate, shivered in the cold wave. Railroad and highway communications were wrecked by a 12-inch rain. Several bodies were sighted floating in the resultant flood waters.

## SUNDAY SCHOOL LESSON

## JULY 7

## MOSES

(Leader and Lawgiver)

Golden text: Blessed is the nation whose God is the Lord. Psalm 33:12a. Lesson: Exodus, Chapter 24. Devotional Reading: Exodus 34: 27-35.

## Explanations and Comments

Moses Leads the People to Ratify the Covenant. Exodus 24: 3-8. After Moses had ascended Mount Sinai and there had lodged in his mind the words and the judgments recorded in Chapters 21, 22 and 23 of Exodus, he told the people about them and they agreed to obey them. With one voice they answered, "All the words which Jehovah hath spoken will we do." Remember that every lip [save of two men] which united in that lightly made vows drew its last breath in the wilderness, and as disobedience, and the burst of homages becomes a sad witness to human weakness and changeableness. For a moment the people were enraptured and obedience seemed easy. They little knew what they were saying in that brief spasm of devotedness. It was high-water mark, but the tide soon turned" (Alexander MacLaren).

Moses first act was to prepare a written copy of the laws which the people had sworn to obey. Then he had a rude altar erected at the base of the mountain to represent the Divine Presence and surrounded it with twelve uneven stones to represent the twelve tribes of Israel. "The use of pillars is an evidence of the antiquity of the rite of sealing the covenant recorded here, as they were afterwards forbidden, owing to their association with heathen worship." See II, 16:22.

The young men offered burnt offerings, and peace-offerings of oxen. "Burnt-offerings and peace-offerings differed mainly in the use made of the sacrifice, which was wholly consumed by fire in the former, while it was in part eaten by the priests in the latter."

The newly-written book was produced and read, and again the people shouted their agreement to obey its laws. Half of the blood of the sacrifice had been poured upon the altar, and now with the other half the people were sprinkled, and thus the covenant was ratified, as the solemn words were spoken, "Behold, the blood of the covenant, which Jehovah hath made with you concerning all these words."

## To Take Out Squeak

Private Firms Will Make Shoes For Royal Marines

To quiet the tread of the Royal Marines of Britain their shoes are to be made by private firms. Since the formation of the organization in 1662 the members have made their own footwear. Admiralty officers announce that the change of makers is for economy, but shoemakers say the real reason is that shoes made by the marines have always squeaked.

## From Coast To Coast

## Canada's Precise Level System

Stretches Over 25,000 Miles

Altitude, or height above sea level, of the site of any proposed development is a matter of importance in the orderly opening up of a new country like Canada. Consequently the provision in accessible form of information concerning exact levels is important. The task of providing such data is one of the duties of the Geodetic Survey of Canada, Department of the Interior.

In line with practically every country in the world, Canada has adopted mean sea level as its datum for altitudes. Sea level may be defined as the surface which the water of the ocean would assume where it not acted upon by the attraction of the sun and the moon or disturbed by the wind.

The actual determination of mean sea level at a primary tidal station is made by the Tidal and Current Division, Hydrographic Service Department of the Marine. Hourly readings on an automatic gauge for a period of at least seven years are considered necessary for a trustworthy determination of mean sea level at a primary station.

The Canadian precise level system is based on the determination of mean sea level at five primary stations, namely, Halifax, Yarmouth, and Father Point, on the Atlantic; and Vancouver and Prince Rupert on the Pacific. By means of precise levels sea level datum is carried inland so that to-day Canada's precise level system stretches from coast to coast and has a total extent of over 25,000 miles—Canada Week By Week.

## Conscription Of Wealth

Canadian Legion Would Cull On All Resources In Event Of War

Conscription of wealth and natural resources, as well as man power in the event of war, was urged in a resolution passed at the closing session of the Saskatchewan command of the Canadian Legion at Moose Jaw.

The convention in another resolution went on record as being in favor of an agreement that every nation should immediately abolish the private manufacture of all implements of war. A number of other resolutions were also discussed and passed. Officers of the provincial organization were elected and several reports read.

E. C. Leslie, Regina, was elected president of the province of all provinces. T. C. Chase, Mervin, was elected first vice-president; R. D. Roberts, Fort San, was elected second vice-president. J. C. Malone, Regina, honorary treasurer, and H. T. Pizzev, Saskatoon, T.V.S. representative.

## An Eight-Eyed Camera

Developed In Germany Can Photograph 220 Square Miles

Keen interest was displayed at Munich, Germany, in military possibilities of an "eight-eyed" aerial camera recently perfected by a local optical firm. The manufacturers said the new panoramic camera is far superior to any now in use.

It was claimed the new camera can photograph in minute detail an area of 220 square miles from an altitude of 15,000 feet. The plates can be developed immediately, then put through another new device which corrects deformations of perspective, and the result assures a faithful reproduction of the countryside, ready for instant use.

It was said fast planes equipped with these cameras could fly over enemy territory and return to home airports with the complete photographic story of troop movements, gun emplacements, ammunition stores and other military information.

## The Hardest Mineral

Diamond Has Qualities Very Similar To Many Humans

The solemn unwrapping at the American Museum of the largest known diamond in the world constitutes a study in the qualities of the diamond, in the words of one authority, is "the hardest, the most imperishable and also the most brilliant of minerals". It is among the rarest, and it also comes close to being one of the most useless. For those qualities it has been regarded through the ages with admiration, fear and awe—very much as hard, durable, brilliant and useless individuals have commonly been regarded by their fellow men.—New York Herald Tribune.

Germans who wish to leave their native land must pay a tax.

## Recipes For This Week

(By Betty Barclay)

## SPANISH SAUSAGE

- 1 pound pork sausage
- 6 small green peppers
- 1 cup bread crumbs
- 1 cup tomatoes
- 1 onion, grated
- 1 cup diced celery.

Mix sausage, bread crumbs, grated onion, and diced celery. Moisten with tomatoes. Cut tops off green peppers, remove seeds and parboil for five minutes. Stuff with sausage mixture and bake in a moderate oven (350 degrees F.) for 30 minutes.

## MUSTARD SALAD DRESSING

- ¾ cup sweetened condensed milk
- ¼ cup tomato catsup
- ¼ cup prepared mustard
- Thoroughly blend sweetened condensed milk, tomato catsup and prepared mustard. Chill. Serve on lettuce or vegetable salad. Makes ¾ cup.

## New Rolling Stock

C.P.R. is Calling For Tenders For New Equipment.

As a preliminary offer in the new equipment program provided for by the Unemployment Relief Act, it was announced the Canadian Pacific Railway had invited railway car companies to submit tenders for 1,500 new freight cars. Additional units including passenger cars and locomotives, will be ordered later.

The invitation for tenders just issued includes 750 box cars, 300 coal cars and 150 refrigerator cars.

It takes eight gallons of special oil to give each of the elephants in the London zoo its annual "beauty bath."

## Household Arts

by Alice Brooks

This Jiffy Knit Blouse is Exclusive With Alice Brooks

PATTERN 5365

Time—so valuable to every one of us—is especially conserved for the knitter in this unusually attractive fifty-knit blouse. Big needles—a lacy stitch and the result is a blouse done in no time. And, what none of us object to, it takes little work to make it. The tied yoke is all in one with the sleeves which, of course, simplifies the making of it. Another feature is that the top of the blouse is really a straight line onto which the yoke is attached. The yoke effect is a very flattering style.

On pattern 5365 you will find complete instructions for making the blouse shown; an illustration of it and of the stitches needed; material requirements. This blouse comes in size 16 to 18 and 38 to 40 (all given in the one pattern) and also contains a plain knitted skirt in these sizes.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

## Local News

Mr. and Mrs. T. Brennan were in Edmonton over the holiday.

Miss Jennie Heibin, is home on holidays from her school at Cowley.

Mrs. H. R. Cady and family arrived from Winnipeg on Monday to reside in Coleman.

Mr. and Mrs. J. Lonsbury and Bill motored to Airdrie on Dominion Day.

Miss Lorraine Rippon is the guest of friends for a few days at Macleod.

Mary Sherrett is spending her summer vacation with her aunt at Vancouver.

The Ladies of St. Paul's United church held their annual strawberry tea in the church rooms on Saturday last, quite a number calling during the afternoon.

Miss Gertrude May and Gordon May of Medicine Hat, formerly of Coleman, were visitors here over the week-end at the home of their sister, Mrs. J. Kerr.

Mr. and Mrs. D. C. Robert spent the week-end enjoying the beauties of Nature at the lake, and Dave tried without avail to catch some of the big fish which are reported to be frequenting the depths of the lake.

Among those who went to Vancouver this week were Mrs. W. S. Purvis, Mrs. W. Graham and family, Mrs. M. Clifford, Miss Olga Hole, Mr. and Mrs. J. Yates and Mr. and Mrs. W. Milley and Billy.

Animals again running at large cause indignant complaints by householders. One gentleman informed The Journal his garden was completely destroyed by marauding cows. The owners should be compelled to pay the damage.

William Aberhart addressed a public meeting last evening in the arena at Bellevue, his address being along similar lines to previous addresses and radio talks. Last summer he addressed a meeting in Pincher Creek as part of his summer campaign.

Coleman people at McBain's lake over the week-end were Mr. and Mrs. A. S. McIntock, Mrs. Harry Gardner, Mrs. Rippon and Ralph, and Mrs. Norman McAuley and "Bonnie." Damp weather rather marred the week-end at this popular resort.

The many friends of Miss Megan Jones met at the station on Tuesday to bid her bon voyage on her trip to Wales where she will spend her two months vacation. Mrs. Ernest Hill also left for Yorkshire, Eng., where she will visit friends for the next three months.

John Kerr left last week for Edmonton, where it is likely he will be enrolled in the R. C. M. P. His brother, James, will continue the business of The Motordrome as usual, which firm Kerr Bros. took over early this year. Business as usual, and lots of it, states Mr. Kerr.

Among the week-end visitors from Coleman at Waterton Lakes were Irene James, Margaret Bell, Mary Kyle, Hector McDonald, Elideo Salvador, Francis Kilgannon, Ray Fredrickson, Billy Stephenson, Norman Phillips, Vic. Lilya, Pete Lemiski, Joe Fisher, Mae Bell, Marjorie Halliwell, Dr. Campbell and Tommy McGovern.

## School Board Notes

The school board sat as a court of revision on Tuesday and heard a few applications against assessment.

It has since been learned that Miss Margaret Allan, B. A., will succeed Miss Gwen Brown, B. A. on the high school staff.

There is business today, but advertising must ask for it.

The depressed price of farm products is a problem with which everyone is familiar, but on the 1913 basis farm product prices have never been as low as gasoline. Between 1913 and 1920 gasoline did not rise in price to nearly the same extent as farm products, yet since 1920 its price has almost continuously declined. The data for the above graph are based on figures published by the Dominion Bureau of Statistics.

## FAIR LABOR POLICIES BENEFIT THE CONSUMER

WORRY and unhappiness are enemies of efficiency. We have always tried to be efficient and years ago we said, "to the greatest extent possible let us get worry and unhappiness out of this organization—out of the minds of every man and woman in our employ."

So Imperial Oil has always paid high wages. It set up sickness and death benefits, a pensions plan and group insurance for its workers. It made it easy for them to share ownership in the Company. It gave them a voice in the discussion of Company

policies that directly affect them. It introduced the forty-hour week, thus increasing the number of those who work for the Company.

Efficiency and loyalty are repaying the Company for all these measures. Imperial Oil employees give generously of their hands and minds because they are well treated. They feel secure and this feeling is reflected in their work and in the high quality and lower cost of the products they make. The consumer benefits, the employees benefit and the Company benefits by these policies.

## Announcement!

E. F. GARE wishes to announce that he has recently taken over the Agency for the

### CONFEDERATION LIFE ASSOCIATION

(One of the Strongest Life Companies in the World)

in The Pass—Coleman to Pincher Creek—and will be glad to meet with old friends and acquaintances, together with many new ones, to assist them in any way possible in connection with Life Insurance problems. I especially desire to meet all Confederation Life policyholders in this territory, in order that I may be in a position to render to them the personal service to which they, as policyholders, are entitled.
